Hiring Manager
Cisco Systems, Inc.

Dear Hiring Manager,

I am writing to express my interest in an internship or entry-level opportunity in software development, IoT systems, or web technologies at Cisco. As a Computer Science student at VIT AP University with a strong academic foundation (GPA: 9.13) and hands-on project experience, I am eager to bring my technical skills and passion for innovation to your team.

During my academic journey, I developed a real-time Women and Child Security System using Raspberry Pi, GPS, GSM, accelerometers, and sensors. This project sharpened my problem-solving and system integration skills while addressing a critical real-world safety issue. I also have strong front-end development experience, using HTML, CSS, JavaScript, and React.js to build responsive web interfaces.

Beyond academics, I've earned certifications in Generative AI, AWS Machine Learning, and C# development, showcasing my commitment to continuous learning. Participating in hackathons and solving 100+ DSA problems has further honed my algorithmic thinking and team collaboration.

I am particularly drawn to Cisco because of its pioneering work in connecting the world through intelligent networks and its strong emphasis on innovation in areas like IoT, cloud computing, and cybersecurity. Your culture of inclusivity, commitment to lifelong learning, and global impact resonate with my own values and aspirations. I believe Cisco offers an ideal environment for me to grow, contribute, and collaborate with some of the brightest minds in the industry.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can add value to your team and learn from the best at Cisco. Please find my resume attached for your review.

Sincerely,
Suhas Sriramaneni
